Question Label : Comprehension

(Read the passage and answer the questions that follow) :

'In many states of India, people prefer sons to daughter, so much so that women are forced to go in for abortion when it is apprehended that the issue is likely to be a female. This age - old social prejudice against female children has undergone little change since indepen-dence. The popular perception considers female children liability and inferior to boys. That the perception is totally misplaced is evident from the examination result of Central Board of Secondary Education, where success percentage of girls has been higher than that of boys for many successive years. Moreover, percentage of female teachers in schools has been progressively increasing. In civil services, medicine and research establishments, the number of women is increasing by the year. It has been established beyond doubt that women are not inferior to men in intelligence and ability . Long term and sustained awareness programmes on electronic and print media on women's equality will demolish gender prejudice against women. Once the masses accept the equality of sexes, preference for sons over daughters will diminish and couples having one or two daughters will go in for family planning in a big way.'

Answer the following questions based on the above passage :
